| <b>Qualifikationsziele</b>   |   |            |  |  |
| The students should be enabled to perform literature searches for analytical methods to analyse proteins, nucleic acids and the biological function of these biomolecules. They should be able to apply these methods. |   |            |  |  |
| <b>Lehrinhalte</b>   |   |            |  |  |
| Independent research in biotechnological databases (medline, web of science) Application of bioanalytical techniques in lab projects. Problems will be suggested by the instructor.                                    |   |            |  |  |
